Author Index, Volume 56 (2006)

Bingham, H.B., 351
Blyth, M.G., 263
Blythe, P.A., 105
Bowles, R., 445
Boyd, J.P., 203
Brindley, J., 161

Coman, C.D., 79

Em Karniadakis, G., 201
Engsig-Karup, A.P., 351

Fatone, L., 385

Gao, P., 35
Giraldo, F.X., 307
Gol'dshtein, V., 129
Goldfarb, I., 101, 129
Gorelov, G.N., 143
Greenberg, J.B., 129
Griffiths, J., 161
Grinberg, L., 289

Haughton, D.M., 79
Heinrichs, W., 337
Hesthaven, J.S., 201, 351
Howe, M.S., 53

Kapila, A.K., 105
Karniadakis, G.E., 289
Kirby, R.M., 273

Law, A.W.K., 69
Lebedyeva, I.V., 371
Li, L., 437
Lockington, D., 437
Luo, H., 263

Madsen, P.A., 351
Martynenko, M.A., 371
McIntosh, A.C., 161
Mercer, G.N., 185

Nelson, M.I., 185
Nielsen, P., 437

Pacelli, G., 385
Parnell, W.J., 1
Pasquetti, R., 323
Pavarino, L.F., 323
Pozrikidis, C., 263

Rapetti, F., 323
Recchioni, M.C., 385

Sawade, D.M., 185
Shah, A.A., 161
Shariff, M.H.B.M., 415
Shchepakina, E.A., 143
Sherwin, S.J., 273
Short, M., 105
Shouman, A.R., 179
Sidhu, H.S., 185
Sobolev, V.A., 143
Song, Z., 437

Taylor, M.A., 221, 237, 307

Warburton, T., 247
Weber, R., 101
Weber, R.O., 185
Wingate, B.A., 221, 237
Wu, W., 23

Zampieri, E., 323
Zinoviev, A., 129
Zirilli, F., 385

Contents of Volume 56 (2006)

Vol. 56 No. 1 September 2006

W.J. Parnell: Coupled thermoelasticity in a composite half-space 1–21

W. Wu: On high-order hypoplastic models for granular materials 23–34

P. Gao: Construction of the exact solution of the ring-plate problem by solving functional equations 35–51

M.S. Howe: Sound produced when a vortex pair is swallowed by a jet 53–67

A.W.K. Law: Velocity and concentration distributions of round and plane turbulent jets 69–78

C.D. Coman and D.M. Haughton: On some approximate methods for the tensile instabilities of thin annular plates 79–99

Vol. 56 No. 2 October 2006

THERMAL EXPLOSION: MODERN DEVELOPMENTS IN MODELLING, COMPUTATION AND APPLICATIONS

Guest Editors: Igor Goldfarb and Rodney Weber

I. Goldfarb and R. Weber: Thermal explosion: modern developments in modelling, computation and applications 101–104

P.A. Blythe, A.K. Kapila and M. Short: Homogeneous ignition for a three-step chain-branching reaction model 105–128

I. Goldfarb, V. Gol'dshtein, J.B. Greenberg and A. Zinoviev: Thermal explosion in a hot gas mixture with organic gel fuel droplets 129–142

G.N. Gorelov, E.A. Shchepakina and V.A. Sobolev: Canards and critical behavior in autocatalytic combustion models 143–160

A.A. Shah, J. Brindley, A.C. McIntosh and J. Griffiths: Gas-phase and heat-exchange effects on the ignition of high- and low-exothermicity porous solids subject to constant heating 161–177

A.R. Shouman : A review of one aspect of the thermal-explosion theory 179–184

R.O. Weber, H.S. Sidhu, D.M. Sawade, G.N. Mercer and M.I. Nelson: Using the Method of Lines to determine critical conditions for thermal ignition 185–200

Vol. 56 No. 3 November 2006

SPECTRAL INTERPOLATION IN NON-ORTHOGONAL DOMAINS: ALGORITHMS AND APPLICATIONS

Edited by: George Em Karniadakis and Jan S. Hesthaven

G. Em Karniadakis and J.S. Hesthaven: Spectral interpolation in non-orthogonal domains: algorithms and applications 201–202

J.P. Boyd: Computing the zeros, maxima and inflection points of Chebyshev, Legendre and Fourier series: solving transcendental equations by spectral interpolation and polynomial rootfinding 203–219

M.A. Taylor and B.A. Wingate: A generalization of prolate spheroidal functions with more uniform resolution to the triangle 221–235

B.A. Wingate and M.A. Taylor: Measuring characteristic length scales of eigenfunctions of Sturm–Liouville equations in one and two dimensions 237–245

T. Warburton: An explicit construction of interpolation nodes on the simplex 247–262

M.G. Blyth, H. Luo and C. Pozrikidis: A comparison of interpolation grids over the triangle or the tetrahedron 263–272

R.M. Kirby and S.J. Sherwin: Aliasing errors due to quadratic nonlinearities on triangular spectral/*hp* element discretisations 273–288

L. Grinberg and G.E. Karniadakis: Hierarchical spectral basis and Galerkin formulation using barycentric quadrature grids in triangular elements 289–306

F.X. Giraldo and M.A. Taylor: A diagonal-mass-matrix triangular-spectral-element method based on cubature points 307–322

R. Pasquetti, F. Rapetti, L.F. Pavarino and E. Zampieri: Neumann–Neumann–Schur complement methods for Fekete spectral elements 323–335

W. Heinrichs: An adaptive least-squares spectral collocation method with triangular elements for the incompressible Navier–Stokes equations 337–350

A.P. Engsig-Karup, J.S. Hesthaven, H.B. Bingham and P.A. Madsen: Nodal DG-FEM solution of high-order Boussinesq-type equations 351–370

Vol. 56 No. 4 December 2006

M.A. Martynenko and I.V. Lebedyeva: Axisymmetric problem for a spherical crack on the interface of elastic media 371–384

L. Fatone, G. Pacelli, M.C. Recchioni and F. Zirilli: Optimal-control methods for two new classes of smart obstacles in time-dependent acoustic scattering 385–413

M.H.B.M. Shariff: An anisotropic model of the Mullins effect 415–435

Z. Song, L. Li, P. Nielsen and D. Lockington: Quantification of tidal watertable overheight in a coastal unconfined aquifer 437–444

2006 *James Lighthill Memorial Paper*

R. Bowles: Lighthill and the triple-deck, separation and transition 445–460
